## Product Description

### WT602 Series Continuous Gas Monitoring System Industrial Waste Gas and Smoke Dust Meter

#### >>> Working Principle

WT602B series products use the principle of laser backscatter to complete the measurement of flue dust concentration. The embedded high stable laser signal source passes through the flue and irradiates the smoke particles. The irradiated smoke particles will reflect the laser signal, and the reflected signal intensity changes positively with the smoke concentration. The concentration of flue dust can be calculated by a specific algorithm.
