Product Description

KL99 Papr Respiratory Face Masky Powered Air Purifying Respiratory

Product Description

>>> Product Application

The KL99-PAPR is a battery-powered fan that together with a filter and an approved head top, is included in the fan-assisted respiratory protective device systems. This applies particularly to work that is hard, warm or of long duration. The human interface may consist of a hood, face shield, half mask or full face mask. The fan is equipped with a filter, and the filtered air is fed through a hose to the human interface. The pressure then generated prevents surrounding pollutants from penetrating into the mask. Power blower unit provides filtered air for the widest range of industrial applications as diverse as industrial welding, agriculture and waste disposal.

>>> Instruction

- **Starting up**

Long press the power button 3s to boot, enter the low-end working state

- **Power off**

Press the power button for 3 consecutive times to turn off, stop working, and all indicator lights are off

- **Indicator light**

There are 4 indicator lights in total, 3 of which are white and green indicating the power level

- **Electric quantity**

When the battery is fully charged, the three-digit indicator light (white) is fully illuminated, and the indicator lights are extinguished one by one as the usage time increases. When the remaining 1 white light flashes, please pay attention to charging.

- **Battery charging**

When charging, the first white light flashes, the first grid is long after 1 grid is filled, the second grid white light is flashing, and so on, and finally the three grid white lights are on, indicating that the battery is fully charged.

Optional Communication Mask System

This product is used as an auxiliary part of communication with the mask. This product has a unique design, which can effectively amplify the voice of the person wearing the mask, keep the communication smooth, and ensure the clear and sonorous sound quality. At the same time, it can also be used in conjunction with the intelligent digital electronic pressure gauge to display the information of the remaining amount of gas in the cylinder. The overall design of the product is exquisite, and the mask is easy to install and operate.
